TOM LEWIS

Senior Full Stack Engineer | UX & Product Leadership | AWS Certified Solutions Architect

tomlewis.dev tlewismedia@gmail.com

With over 15 years of experience building scalable applications, shaping product strategy, and leading multidisciplinary teams, I am passionate about discovering and understanding core problems and innovating solutions.

RECENT PROJECTS

Starling Data

A **RAG** copilot designed for compliance teams in financial institutions. It provides grounded answers derived from a corpus of internal and external regulations. Aligning with industry requirements, it features inline citations, confidence levels, and defensible, auditable responses. Built with **React**, **Next.js**, **LangGraph**, and **Pinecone** (vector DB).

View project

Social Forms

A collaborative form authoring platform with advanced UX addressing the tediousness of traditional enterprise forms. Features complex structures, robust state management, and a custom form logic builder. Built with **Angular** and **Nest.js**.

EXPERIENCE

Digital Harbor

'Form Designer' Team Lead, Product Team Lead, Full Stack Developer
2020 - 2026

- Led product, design, and engineering for ***Social Forms***, an enterprise form-building platform focused on solving the frustrations of multi-user forms with complex workflows.
- Developed an Assistive UI system for contextual help/dialog including a performant custom animation engine (RAF techniques) reducing rendering lag by 30%.
- Built ***Social Autofill***, a feature leveraging LLM embeddings for intelligent form completion; drove adoption from near 0% to 100% of form designers.
- Architected ***DesignKit***, a theming and template system that changed how teams approached forms — from utilitarian defaults to considered, brand-forward designs.
- Led adoption of a unified dev/QA testing process built on **Playwright** and AI-assisted test generation, increasing e2e test coverage by 50% and boosting shipping confidence.
- Established **Storybook** and a component system strategy to align design and engineering, including automated story generation workflows.

Ricochet Partners

Junior Programmer → Senior Programmer → Solution Architect
2014 - 2019

- Led development of web applications and digital products for clients including **Nike**, **Intel**, **Georgia Pacific**, and **Toyota**, providing technical direction, architecture, and implementation strategy.
- Built a 3D interactive web app for a **Rohde & Schwarz** electronics test chamber using JavaScript, Web Components, Webpack, and the Sketchfab API.
- Developed prototypes and advised on UX for a legal document management application for a major semiconductor manufacturer.
- Architected and built a Learning Management System with a Ruby on Rails API and Angular front end.
- Created a proof-of-concept and led development for an AR app for a Georgia Pacific trade show using Unity, C#, 3D modeling, and Xcode/TestFlight.

TLewisMedia

Independent Web Designer & Developer
2007 - 2014

- Delivered projects across entertainment, finance, and e-commerce for clients including the **Writers Guild of America**, **Fox Studios**, and **Kopion Asset Management**.
- Managed full project lifecycle from client communication and requirements gathering through design, development, and launch.

SKILLS

Languages
TypeScript / JavaScript
HTML
CSS
Python
Ruby
Elixir

Frameworks
AWS
Angular
React
LangGraph
Svelte
Nest.js
Next.js

Core Competencies
Front-End & Full Stack Development
Product & Team Leadership
Wireframing / High Level Design
User Testing
UX Engineering

EDUCATION / CERTIFICATIONS

AWS Solutions Architect Associate
Amazon Web Services (2026)

Oregon State University
Bachelor of Science
Computer Science (2014)

4.0 GPA

Alfred University
Bachelor of Fine Arts
Expanded Media (2006)

Magna Cum Laude
